

Andrea Electronics

3D Surround Sound Recording Headsets

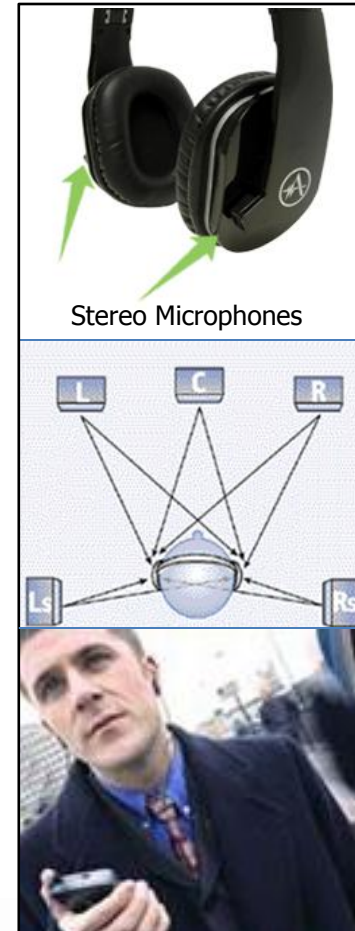

**Capture  
a Memory!**

## Virtual 3D Surround Sound Recording

- Great for recording live music, videos, events and even environmental sound samples.
- Binaural recording feature enables life-like surround sound capture of the users listening environment.
- Stereo microphones placed in close proximity to each of the user's left and right ears establish a "Real Head Transfer Function."
- Sound arriving at each microphone is in natural phase and duplicates real ear sound capture.
- Headphone playback then delivers a virtual 3D surround sound, reproducing one's listening experience.

## Ease of Use - Plug & Play

- Andrea's SuperBeam Headsets can be used with any PC, Digital Audio Handheld Recorder, Camcorder or DSLR Camera that is equipped with external speaker and microphone 3.5mm jacks or a standard USB Port.
- Simply plug your Andrea SuperBeam Headset into a compatible device, make your recording and playback to hear a true life-like listening experience.

## Sample Compatible Devices

Newer DSLR Cameras with separate 3.5mm speaker and microphone jacks.

Most Camcorders with separate 3.5mm speaker and microphone jacks.

All laptop, desktop and Mac computers with a USB jack or separate 3.5mm speaker and microphone jacks.

Most Audio Recorders with separate 3.5mm speaker and microphone jacks.

## Summary

### A New Exciting Accessory for Mobile Recording

- Using Andrea's SuperBeam Headsets will turn what would have been an ordinary mono recording into a 3D Surround Sound Experience capturing the live sound.
- Playback provides a real life experience allowing the listener to hear playback the way it was meant to be heard!
