

Andrea Electronics' Noise Canceling Technology Debuts in New Bluetooth Headset

New PureAudio Wireless Headset Introduces Increased Intelligibility at Breakthrough Price

BOHEMIA, New York, March 29, 2007 --Andrea Electronics Corporation (OTCBB: ANDR - News), a leading developer of active noise cancellation technologies, has announced the launch of the PureAudio Bluetooth Noise Canceling Headset (BT-200). Andrea is providing its award-winning noise cancellation boom microphone technology at an affordable price for use with most mobile phones and PCs, wirelessly connecting the headset through a standard Bluetooth interface.

“At a time when consumer's lives are more mobile than ever, we are now delivering the most intelligible wireless headset that comfortably fits into any lifestyle or budget,” said Douglas Andrea, CEO of Andrea Electronics. “The introduction of the BT-200 extends our portfolio to include new, innovative audio accessories that give consumers the most effective noise canceling technology and listening experience available, at an affordable price.”

Andrea Electronics has designed their innovative noise canceling technology into a simple to use wireless headset. The BT-200 enhances sound quality to deliver a PureAudio experience even in extremely noisy environments. A superior noise canceling microphone improves sound quality and performs accurate speech recognition by eliminating background noise. A pioneer in noise-canceling microphone technologies, Andrea's long history includes extensive experience in developing military-grade intercom systems dating back to the 1960's. Springing from the extensive R&D experience of developing military-grade technologies, Andrea's noise cancellation audio technologies are today improving the experience of commercially available consumer devices at breakthrough price points.

The new PureAudio BT-200 is a sleek and stylish portable headset that lets users make clear, crisp wireless phone calls and is the ideal solution for hands free mobile communications in almost any noisy environment, allowing users to have clear, noise-free conversations while using a cell phone or PC application such as VoIP, speech recognition programs and gaming systems such as the Sony PlayStation®3. From your VoIP call in the office to your cell phone call in the airport, Andrea's PureAudio technology ensures your communications are not impacted by your environment.

The Bluetooth Noise Canceling Headset will be available at <http://www.andraelectronics.com> with an MSRP of \$89.95.

About Andrea Electronics

Andrea Electronics Corporation designs, develops and manufactures audio technologies and equipment for enhancing applications that require high performance and high quality voice input. The Company's patented Digital Super Directional Array (DSDA®), patent-pending Directional Finding and Tracking Array (DFTA®), patented PureAudio®, and patented EchoStop(TM) far-field microphone technologies enhance a wide range of audio products to eliminate background noise and ensure the optimum performance of voice applications.
